DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record alone or in combination does not teach or suggest the lens actuator having the combination of elements with their recited structure and arrangement, along with having: the roll resonance frequency set to be a setting value different from a rotation frequency of the spindle motor in that the rotation frequency corresponds to a multiple value of a standard data transmission speed in the optical disk, as set forth in claims 12-15; and the damper member is filled in the fixing block and has a feature of obtaining a maximum attenuation or a maximum loss in a vicinity of a roll resonance frequency, as set forth in claims 16-18, and as discloses in the specification.
